Everyone's favorite benchmark by CreativeTools went to the gym.

Have you dialed in your machine to print the perfect Benchy? Need to turn up the difficulty? This 100% size 3dBenchy rests upon the shoulders of the body of Ultra Swole Pikachu. This will test your supports as well as your calibration.

Will you succeed or will you snap the feet/base of when attempting to print a 50% version (pictured, like I did)?
