This is a remix/redesign of this simple case design:

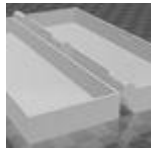

<https://www.printables.com/model/49971-simple-case>

I wanted to create a smaller case for my wife's magnetic clip sunglasses. It will hold low profile or smaller framed glasses as well (I reduced the height of the original design and tapered the corners and angled the lid. I added a bridge support to reduce the movement of glasses in the case. I recommend lining it with some felt for extra protection.

Will fit glasses frames that are folded up to 145mm x 55mm x 30mm.

Print in place. No supports needed. .2mm
