A neat little organizer for your spices. Every one holds up to five spices with a diameter of 43mm. The most common size i found in a german kitchen.

Prusa Mini owners have to print it rotated 45 degrees and have to lower the skirt distance. I have given a gcode to show.

Prints without support and you can choose whatever material you like.

Maybe you could print the first few layers in flex if your kitchen moves a lot like for example on a boat or in a camper. To seal the spices you can put another one in the top.
