Summary

Sofirn Q8 Pro diffuser with a lanyard attachment point

[Gadgets](#) > [Other Gadgets](#)

Tags: sofirn

This is a diffuser for Sofirn's Q8 Pro. By design, the fit is tight enough that the flashlight can be hung from the integrated lanyard loop attachment point.

I printed this in esun GITD PLA with 10% gyroid infill and fuzzy skin (outside only, 0.1 thickness). Use of this diffuser should be relegated to lower brightness settings unless materials with a higher temperature resistance are used.
