[carpanel](#)

This autoclip is applied in the car, truck and other vehicles industry. With an OE clip, panels, strips, bumpers and other parts are connected to each other or the chassis of the vehicle. Often the clip breaks when discontinuation of these parts. Replacement of the correct clip ensures that vibration or release is prevented from the part.

This is a perfect fit from the original.

Best printed in PETG or above with 100% infill and small layer height (0.10 recommended)
