A must have in every tool-assortment → the Wera Tool-Check

I designed this holder with a few degrees angle to the tool-wall, so that you do not need too much space above the holder to take the tool out.

It is for the 150mm Tool-Check from Wera and the space in-between the two holders is 152mm.

BOM:

- 2x Skadis Push Trough Interlock Mount → [Printables](#)
 - 2x M3x14mm Round headed screw

Installation:

- install the interlock mount
- put on the Skadis pegboard and have fun !
