## Summary

Just a quick little model of the Robux coin. I made two variants - one with hole in the middle and one without.

### UPDATE 07.01.2024

I uploaded V2 where I cut a hole through the center. Some might prefer that look.

Just a quick little model of the Robux coin. I didn't find any other models here on Thingiverse of this new coin design in Roblox, so I made this quick design in Fusion 360. It's made from a SVG I found in the official Roblox developer resources.

## Print Settings

### Printer Brand:

Creality

**Printer:**

CR-10

**Rafts:**

No

**Supports:**

No

**Resolution:**

0.2

**Infill:**

20

**Filament:** Fiberlogy PLA SILK Fibersilk Gold

**Notes:**

It's an quick and easy print. I really recommend using a concentric solid fill on the bottom, gives a nice look and matches the rest of the design.
