Summary

A rack to hold backgammon chips if your board didn't include one.

Tags: [rack](#) [storage](#) [backgammon](#)

A simple rack to hold your backgammon chips if you have a board that didn't come with them.

No supports or rafts needed.

I'm including the Fusion360 file. The chip size is set in the project parameters if you need to customize them.

The included stl is for a chip of 35.2 mm (diameter) x 7mm and a wall thickness of 5mm.

I'm also including the make because it looks fabulous!
