The set of parts for assembly and printing machines as promised :)

Body recommends that you print from the PLA, the rest of the ABS

The sequence of colors is written in files.

1.Shiny bolted to the axles via m3 bolts, dropping a little glue is not the thread, leaving a small gap for the free rotation of the wheel.

1. Next, insert the caps in the tires, if it is necessary to glue.
2. Axis and everything else, too, glue or epoxy glue.
