Just a little QTip Holder with a lid, should be printed in "vase"-mode.

My wife wanted such a thing, and because I couldn't find the right one I created one.

The lid should be a bit loose for easy opening and closing.

Edit 2023-01-01: I uploaded a version 2 with another lid and base, where I simply changed out the inlet so that it now sits in the base, not in the lid for easier closing.
