Every year my household tradition is to print Halloween decorations for fun. This year I found the amazing Lego-Like Skeleton model from **Julia Ebert** and wanted to enhance it with some fun Pirate accessories. While there were existing models out there they weren't scaled to this one and weren't designed to be direct fit parts. My models are scaled to fit perfectly, use the same connector pins as the original, and are split for easy printing.

The tri-corner hat can be found here: <https://www.printables.com/model/149408-minifigbigfig-tricorn-hat>

Printing Notes:

Printing from the included 3mf files is recommended as supports have already been added where needed on the peg leg. You will need to print 2 extra connector pins from the original model in addition to:

1x Peg Leg.3mf

1x Pirate Hook Hand Split.3mf

I have included STL files as well if you wish to change orientation or supports.

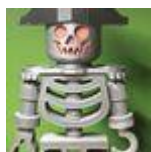

Happy Halloween!
