Who wants to keep their tooth brush mounted proudly in the middle of the bathroom for all to see? Put that sucker in a drawer. This holder keeps your brush away from surfaces and allows it to drip and air dry without developing any smell. Holder is hollow and open to the air so it can dry out if it gets wet. It only touches the toothbrush and counter/drawer in 4 small places.

Prints in 2:15 with supports that are relatively easy to remove. Uses around 20 g of filament, so you can print a new one once or twice a year instead of cleaning it.

Public domain dedication.
