Summary

All that's Required is a V-wheel with a 6802 bearing

[3D Printers](#) > [Accessories](#)

All that's Required is a V-wheel with a 6802 Bearing. I dropped a spool and it broke the side of spool off, so my only option was to lay it flat to continue to print with it. I needed one so I designed one in Tinkercad. It works great and it spins smoothly.
