HAPPY PRINTING!!

I printed it with 4 layers of wall and 0% imprinting (I succeeded with 0% imprinting, but I recommend 10% because it's a little more powerful. I recommend using an in-person pen.

Model downscaling may mean fusion of cross-sections, and upscaling may require support. It was tried and tested on a 100% scale, and the printing was excellent.

For best results, ensure that the printer remains calibrated, horizontal, and folded. And please share what you made!
