This is a model based on the troll skull found in the game 'The Elder Scrolls V: Skyrim'.

I have included a large hollow version which has been split into parts, and a smaller solid version in two pieces. The large version, assembled with the jaw, is approximately 31 cm long by 30 cm high by 20 cm wide. Both versions require supports.

Pieces numbered in the pictures above:

1. skull teeth upper
2. skull front
3. skull middle
4. horns R
5. skull back
6. horns L (not shown)

7. jaw front
8. jaw bottom
9. jaw top

All pieces have holes in which to fit the square connecting pegs, which will aid in assembly. 12 pegs are needed.

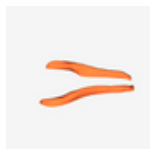

Edit April 18 2023: Added a peg hole to right horns, changed size of peg holes in jaw front.

The lamp seen in the background is also printable, and for sale on my Gumroad store: <https://gumroad.com/l/HLEFu>

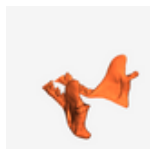

Print instructions

Supports needed.
