Remix of Diogosantos88's Drag Chain - Cable Chain - Ender 3 (Thingiverse)

Join our Discord Here

Update 12/11/23
Went through and fixed the bad faces in the models, so Prusa Slicer and Bambu Slicer shouldn't hit you with an error.

Update 23/12/22
Added Remix of PerryOnCrack's Remix of my OG Extruder Mount - Now has V-Slot Cover

Highly Recommend checking out Visthum's Remix of the chain, going behind the printer with curves.

Printing Guide:

- 41 x Chains
- 41 x Clips
- 1 x Under Printer Clip
- 1 x Y Axis Mount (Support) (Exclusively the Ender 3 S1)
- 1 x Extruder Mount w/ V-Slot Cover (Support)

To attach the **Under Printer Clip** gently pinch the two arrows together underneath the printer.

Suggested Slicer Settings:

- Layer Height: 0.16-0.20
- Infill: 100%

For **Ender 3 v2 users**, please see Turricanus' Remix of the Cable Chain.

The photos showing off the cable pay homage to the first people who printed it. I thank you.

This remix is based on

Adjusted Extruder Mount for Ender 3 S1 Cable Chain
