Tags: [battery](#) [case](#) [dji](#) [mini3pro](#) [drone](#)

A hollow replica of the DJI Mini 3 Pro battery that can slot into the Fly More kit charging hub. It also doubles as a container for accessories and can fit a spare set of propellers, mini screwdriver, and a couple of full size and micro SD cards.

For maximum durability, print the "Top" part as is (around 60 degrees) to minimize the need for internal supports. Include manual supports to improve stability while printing.
