This is a light and sturdy headphones holder for placing them under the desk.

It's easy to print and pretty fast also (0.4 layers in ~50 mins).

It only needs two screws as the desk does the rest.

Print instructions

Like I said in the description, it's easy to print as long as you place it on it's back - see photo (it should be that way when you import it).

Doesn't need supports.

I printed it in **PLA** with an **0.6** nozzle and **0.4** layer height, **no infill**, **0.6** perimeters.
