This is a remix of Xiaomi Mija Handheld Vacuum Connector from Hans Schulz <https://www.printables.com/model/100083-xiaomi-mija-handheld-vacuum-connector>

The purpose is to add a flexible tube coming drain of a washing machine (just a flexible tube that I happened to have around at home). The idea was to add an adapter at the other end to plug to my electric saw.

After printing I realize that my vacuum cleaner has a different connector (seems to be a different model) but maybe this is useful for someone else who owns the same model as Hans Schulz.

The latch part I did not modify, so just use the one from Hans' model
