Summary

An easy to print sample spool to store your samples in our nobufile boxes

[3D Printers](#) > [Accessories](#)

Tags: [spool](#) [sample](#) [accessoires](#)

Our sample spool can be used with small samples of materials, like our 50g and 100g samples and up to 200g in total.

The sample spool is easy to print even on a Prusa MINI with different kind of materials.

It has been designed by Jim van Hazendonk with simplicity in mind. Just print the file twice and add a piece of filament to lock it in place. You can use up to 2 sample spools in our box so that they can be easily stored.
