This is just a rotated version (15 degrees from the hexagon) of the [Hexagon Hook for Prusa Mini Base](#) designed by [Yasir Bilgic](#)

The original model wasn't exactly in a vertical position when placed on the leg. I just rotated 15 degrees the hook from the hexagon to have it in a vertical position

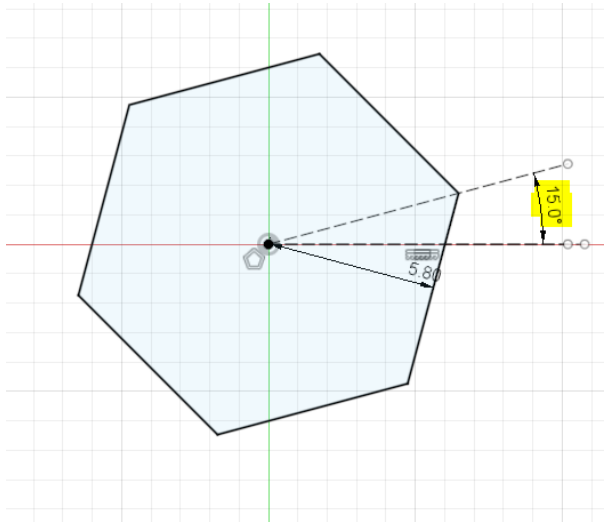

Depending on the leg position (Front / Rear / Left / Right) you'll need a +/-15 degrees rotated hook

- +15 degrees for Front/Left and Rear/Right legs

- -15 degrees for Front/Right and Rear/Left legs

You can adjust angle in Fusion 360, by modifying 1st sketch

Printed in Prusament PETG Orange with standard PrusaSlicer parameters and 0.15mm layer height and 3 perimeters

On top of .stl and .3mf files, I uploaded Fusion 360 .f3d file so you can modify the design and adapt it to your needs

As usual, feedback and comments (and for sure "likes") will be always welcome. Feel free to post nice pictures of your makes

Enjoy

If you like this model, take a look also at [my other designs](#)
