For my clip I used the original design by '**JoelG**' which I think is the very best of all. Good Design.

### Filament clip for 4mm spool:

I changed the width to 10mm and basically made the clip taller and a bit thicker to hold the filament tighter. The clip can be opened more easily and can hold both filaments with 1.75 and 2.85mm.

### Filament clip for 3mm spool:

Some spools have a smooth surface, therefore the clip needs more force here. The new designed V2 clip holds better on narrow spools with a diameter of 2.5 - 3.0mm.

## Print recommendations:

- Perimeters: 3
- Solid layers - top-bottom: 6-4
- Filament: PETG
- Infill: 15%, Gyroid
- Brim: not necessary
- Layer height: 0.20mm Quality
