Summary

This is not a typical remix (edited stl). I was not able to print his design on my modified Cetus printer.

This is not a typical remix (edited stl). I was not able to print his design on my modified Cetus printer. Joints always got fused and could not make them rotate.

I took @andrei bag clip and recreated in my own fusion project from the scratch. Except the overall look entire design is mine, so if it does not work blame me, not andrei :) My design has additional supports inside, and has 0.6mm clearance, so any normal printer should do the job.

design can be downloaded from <https://a360.co/2xLsUig>
