Summary

These are some 3D designed mounts for microscopes like the Andonstar AD407 & AD208

Tags: [75mm](#) [andonstar](#) [microscope](#) [mount](#) [vesa](#) [vesa75](#)

I designed these mounts for the Andonstar microscope to be able to mount it to a TV Vesa style boom arm as I found the base of the microscope was too small for what I required. I also designed it for a YouTuber (Joey Does Tech) to help him in making use of the microscope he has (AD407).

The main one which Scoppr-mount.stl attaches to Scope-mount-vesa.stl with nuts & bolts. It can then be attached to the tv boom arm (75mm). The 2nd (Fantabulous_Curcan-Blorr.stl) attaches directly to the tv boom arm & uses the adjustable stand that you remove from the base & attach to this part.

The 3rd part (Scope-mount-lights.stl) is an optional extra for the scoppr-mount.stl which is for wiring the led lights.
