updated 10. 11. 2022 | published 10. 11. 2022

Summary

This remote holder hooks on the adjustable bed posts that most colleges have (at least in the US).

A simple Roku remote holder, that hooks onto the height-adjustable pegs on college beds. Designed for pegs 76mm apart (center to center), but may also work on other similar beds.

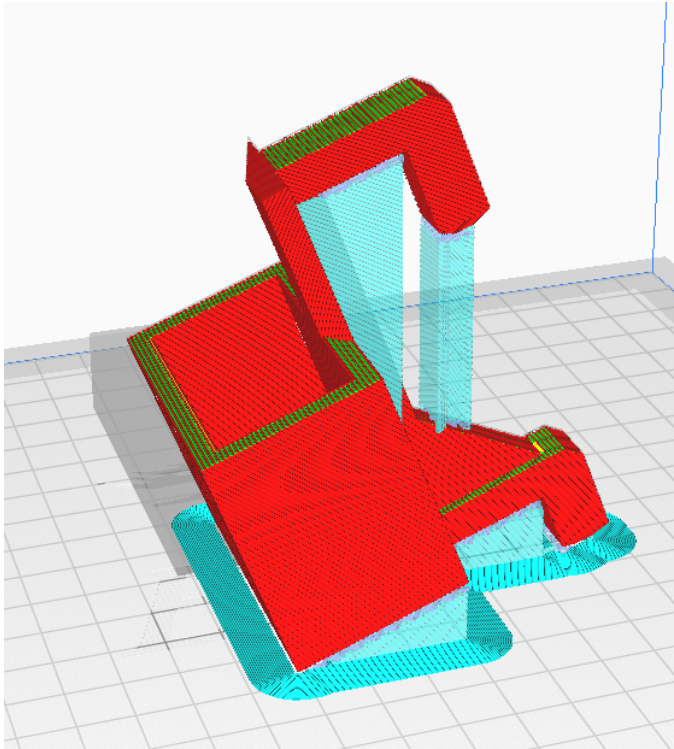

Print Settings:

Infill: > 10

Supports: Yes

Brim: Yes

I printed at an angle and blocked supports in the slots to cut down on supports.

Let me know if you would like anything resized. I would just share the f3d file, but I made this about a year ago when I was new to 3d modeling and the timeline is not pretty.
