A stylus holder designed for my niece as her tablet did not come with a stand.

It is based on one of her favorite animals, an Axolotl.

It was designed with the Huion PW100 in mind, but it works just as fine with the PW500.

Might possibly work with other Styli, fits the Intuos 3 stylus (ZP501E), the Cintiq 13HD stylus (KP503E) is wobbly when inserted though.

Should be printed with supports for the 'external gills'.
