A keychain with the Swedish Dala horse on it. This was my first attempt at multicolor printing on a single extruder printer.

The gcode will stop once the "back" is done, eject the filament and request new filament. once that's done, just press the button and it'll continue printing the horse.

### Print instructions

I printed at 0.1mm and 40pct infill.  
at about 23 minutes in it'll ask for new filament
