iPhone 6 & 7 plus holder with hr herbert richter fast fix panorama adapter plate for in car navi application.

the adapter plate ist not fix, so you can create your own shape if needed. easy assembling, no glue needed, self snapping into place. first slide the adapter plate into the phone holder until the upper limit. insert the hr fast fix into the plate by slightly pressing in and sliding upwards. disassembling by sliding upwards and holding the adapter plate and sliding downwards the hr fast fix while slightly pushing backwards the plate. some horizontal gap remains after assembling, this is necessary and normal. no force needed!

Print instructions
