### Summary

A Kirby sculpture done in blender that I "succesfully" printed.

Tags: [nintendo](#) [kirby](#)

I wanted it to be as cursed as posible, so i gave him socks and lifeless eyes.

Well I,m new in 3d printing and my anycubic vyper isnt fully calibrated, so sorry for the lack of information. I used cura with the standart configuration for matte pla.

I used supports touching buildplate, 2 perimeters and 20% infill.

The soles and the bottom can get a bit rough and its a pain to sand in such a small area, so please let me know the best way to improve it.
