A small SLS-inspired toy for the [2022 Christmas Print Drive](#).

(Photos coming soon)

PRINT SETTINGS AND INFORMATION

Printed with 0.2mm Layer height, 15% infill, and 4 top/bottom layers. Took me roughly 4 hours to print, though your mileage may vary. No supports or raft needed, as per the Print Drive guidelines. for “most accurate appearance” print in White, Orange, or Grey. Stands at roughly 175mm tall, and is by no means an accurate model of the real rocket.
