For my son's birthday, we made him a huge paper mache PokeBall and put his "big gift" inside. I made a hinge, the button for the front, and a printed edge for when the ball is opened to help it keep its shape.

We bought a jumbo balloon, blew it up to 17" and paper mached it using string, newspaper, and finally colored construction paper (red, white, and black of course). Once it was done and dried, I cut it in half and added the 3d printed accessories. Came out pretty good and my son was thrilled.
