Hello

I made this fan duct for sprite extruder. It is still in testing but for now everything works fine.

Im pretty new to Fusion 360 and i made it for learning purposes.

You need:

- 2x 20mm M3 screws
- 1x 12mm M3 screw

Suggest you to print this duct in PETG with tree supports touching bulidplate.

**\*Edit\* Added new version with three outlets.**

## Print Settings

### Printer Brand:

Creality

### Printer:

Ender 3

### Rafts:

No

### Supports:

Yes

### Resolution:

0,28

### Infill:

20
