A socket, which is compatible with common Mignon AA or Micro AAA batteries. Each contact interface features an input for a banana plug. I primarily connect this piece to a multi meter to gain a simple easy to use battery tester but I'm sure it is suitable for other applications as well.

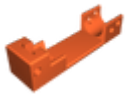

Printing:

- on the flat surface
- 2+ perimeters
- 15%+ infill
- solid filament

Required hardware:

- 18x11x1 mm spring contact
