Summary

a stand that props up the laptop and helps with airflow

[Gadgets](#) > [Computers](#)

[laptopstand](#) [nosupport](#) [nosupports](#) [stand](#)

A small laptop stand that props up the back of the laptop for improved airflow and cooling.

The stand is designed for thicker laptops, as it was designed for a Dell Latitude 5511.

I printed the stand on my Tevo Tarantula with a 0.2 layer height and 3 perimeters and it's plenty strong.

Remixes are welcome :)
