updated 6. 1. 2024 | published 6. 1. 2024

Summary

I designed a frame that will hold dried flowers on my wall. It's an ellipse that is about seven inches by three inches.

Note: Reselling of 3D model files is not allowed.

Flower frame for holding small dried flower bouquets.

Printed it in PLA with very little supports (just the hole in the bottom).

Note: I've updated the model to include larger flowers. There are spacers to get the size just right.

PLA.

10% infill with 3-4 walls.
