Remixed my own decoration design for the darkest dungeon stress crown to add a hole and scale it down so it's usable as a keychain (though i doubt the small parts will stand up to much stress) or earrings.

warning: I made the spikes "spikey" because I think it looks cool, however I think this will be a difficult print without supports all over (no flat surfaces). Therefor i added a flat version aswell to be able to print flat though not as cool looking.

Looking forward to seeing it made and worn, please upload pics if you do.
