[shoppingcarttoken](#) [carttoken](#)

Very useful cointoken on a keychain to open the shopping carts. The model was designed by Jim van Hazendonk from Nobufile as a giveaway for the makerfaire in Hannover.

With the recycled PETG from Nobufile it is tough enough to get it out of the cart without breaking it. Looks better when it is printed with 2 colors. Prints with Ender3V2 and every Prusa FDM printer without support.
