You can place the TV Remote Control adjacent to your armchair at a convenient height.

The chain goes over the arm. There are 1 mm tall teeth on one side of each link that secures the chain to the fabric arm. I was surprised at its holding power. If the arm is non-fabric, there are no teeth on the other side of each link. the chan can then be fastened to the plate, which is placed under the seat cushion. I used four chains altogether in the fabric chair shown in the photos.

One of the three prints provides two five-link chains. You will likely need to print these a couple of times to get the chains of sufficient length.

The chain tabs are sufficiently flexible to allow for combining.
