Summary

A print in place lightweight clip originally designed for holding choir music open at the correct page

[Hobby & Makers](#) > [Organizers](#)

Tags: [paperclip](#) [peg](#) [printinplace](#)

Originally designed as a page holder for sheet music but can be used for holding any paperwork together. The picture shows them with embossed text which I've removed in the stl file. A hanging hole has also been added.

A suitable compression spring is fitted between the raised bosses to provide tension.

The type I used are 9mm dia x 35mm length (0.35" dia x 1.43" length) but size isn't critical to a point. This size does bent quite nicely to sit snugly in the retaining sockets.
