Summary

Insulators parts for old LIMA TGV's, Golden series shouldn't be the only ones to get such basic details

Tags: [insulator](#) [lima](#) [replacementpart](#) [tgv](#) [isolateur](#)

I don't know if it was to cut cost, but Lima on their normal non golden tgvs didn't include isolators. Really a shame to not include such basic parts.

It was bothering me, so here you go, you can print them for yourself rather than buying them at 3€ each (it cost me less than 0.1 € per part with supports to print)

Sadly the friction fit doesn't work well, so i'll glue mines once painted.

Happy printing.

PS: Please do not print and sell without my written permission
