Summary

Remote holder for Voron 2.4 LED lighting

[3D Printers](#) > [3D Printers - Upgrades](#)

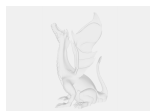

Tags: [led](#) [remote](#) [novostella](#)

I designed this to hold the remote for my LED lighting on my Voron 2.4 The remote is from a 24V Novostella 20ft Tunable White LED Strip Light kit I purchased on Amazon. I attached the holder directly to one of the side panels using 3M VHB tape.

I have included Fusion 360 and STEP files so that it can be modified to suit any remote that is of a similar shape.

Please feel free to modify and/or share.
