I have an Ikea Molger rack alongside my shower which is great for when I need a new towel, but not if I'm reusing one .... So ... I made a hook to resolve that problem!

The clips should have enough tension to keep a towel's weight. I was able to pull my rack over without the clip releasing it's grip, so seems strong enough!

This design was made to accomodate a broomstick with a diameter of 23mm.

## Print instructions

- Simply print the top and bottom part
- Remove supports of the top part
- Saw a piece of broomstick (I opted for a 25 cm piece)
- Stick the broomstick through the top part
- Click the top part into the rack
- Click in the bottom part
- Lower the stick & top part to let the broomstick rest in the cradle
- Add a towel
