In my quest to Gridfinitize(?) the mountain of garbage that is my desk. I needed a phone holder that could accommodate a charging cable. The few options that exist didn't have clever cable concealment (love that alliteration). I started with a phone holder [design](#) I did like from [jagdeepnaik](#). I took that model and squished it on a 2x2x2 Gridfinity block and behold!

The one down side is that it does require supports but they remove easily.

The red semi-transparent glittery goodness I printed this with is Fusion Filaments [Reactor Red HTPET+](#) on an Ender 3 S1 Pro.
