Summary

Needed to measure a fillet greater than 20mm but couldn't find a gauge anywhere.

Tags: [fillet](#) [filletgauge](#) [fillettool](#)

I needed to measure a fillet that was somewhere in the 20 to 30 mm range and could find any models so I remixed my favorite set to accommodate my needs. The outer diameter is the same as [DatumCAD](#)'s so if you're using them (like I am) this one will fit right in.

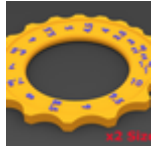

I did however make the inner diameter smaller to accommodate the larger radii. Also I used 2mm increments for the same reason.

No special print instructions.

Enjoy.
