Summary

I really like the Base Plate! But, I wanted cleaning ports, so I whipped up these covers.

I really like the base plate. It give a much cleaner look to my machine and catches the debris, as well. But, I wanted a little cleanout port, do I used my slicer to make 30mm holes in the plate and printed up these removable covers so that I could easily clean out the trays. They print fast and are glued together after printing. Then, I just set them in place until it's time to clear out the trays.
