updated 10. 11. 2022 | published 10. 11. 2022

Summary

Remix of Ananords JUUKE-Box. 30mm Arcade-Buttons and Rotatory-Encoder.

[Hobby & Makers](#) > [Music](#)

I liked Ananords design, but ordered 30mm Arcade-Buttons, so i had to re-design the top-part. Because i used a long rotatory encoder, i had to print a new "nose".

The software part is handled by a Wemos D1 Mini inside, in combination with ESPhome, Home Assistant and a LMS

Holder for the D1 Mini is NOT included in this design (i used glue).

This remix is based on

JUUKE - RFID Music Player

by Ananords
