Summary

Simple desktop stand for Arturia Keystep 37

[Hobby & Makers](#) > [Music](#)

Tags: [arturia](#) [keyboard](#) [keystep](#) [midi](#) [synth](#)

Needed a stand for my Keystep 37 and found <https://www.printables.com/model/57533-arturia-keystep-60o-stand> by **boomNinjaVanish**

Unfortunately the Keystep and Keystep 37 differs by ~5 mm so I drew this one with inspiration from above mentioned. I changed the angle and little bit and added some stabilization to the outer brackets.

The middle one is optional... With a minimal download either left or right is necessary, just mirror in the slicer (and split and print the lower part for the middle one)

OR

print the 2-3 copies of the middle one if you don't need the extra stabilization...

This remix is based on

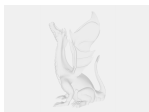

Arturia Keystep 60° Stand
