This unique art deco chess set is based on designs commissioned by Project Manager Pedro Ludovico Teixeira around the turn of last century for the foundation of Goiania, the new capital of the State of Goias. It should print fine without supports at the model scale, which is 35mm pawn, 40mm rook and knight, 50mm bishop, and 60mm king and queen.

I hope that you take a look at it and get a new perspective on an area of the world that people often overlook - Brazil's interior. The State of Goias has digital artists and designers with unique perspectives and native designs that are as unique as the cerrado, and they can give you something the world has never seen.

Includes new queen that can be printed even larger without supports.

**Notes:**

These have a ridiculous number of polys, I realize this. Check out the website in my profile for links to the native sketchup files, photos and info on the State of Goias, and loads of interesting designs made by digital commission artists in the State of Goias.
