Tags: [upgrade](#) [octoprint](#) [raspberrypi](#) [ender3](#) [klipper](#)

This is an all in one package for installing a raspberry pi to your Creality style printer. It uses a case from Micro Center to hold the pi itself, then that case slides into the model, and is held in place with the PiGate. The buck converter case uses m3 heat-set inserts to hold the PCB.

I printed this on an Ender-3 with Printbed PLA

Thank you and Happy Printing!
