Tags: **3dsets** **bamboo4x4**

This clip on print allows the Engine cover from Print 42 in the 3DSETS Bamboo 4x4 files to work on a brushed 540 motor. I printed this in Prusament PETG Galaxy black. I have a 55T motor and runs cool. I have not tested on any other motor besides this motor in the geared transmission. One M3X10mm screw secures the valve cover to the print. I printed with 50% infill on my Prusa mini.
